CANADIAN FELLOWSHIP GUIDE

PRESENTED BY THE SOGC RESIDENT COMMITTEE

THE SOCIETY OF OBSTETRICIANS
AND GYNAECOLOGISTS OF CANADA

LA SOCIÉTÉ DES OBSTÉTRICIENS
ET GYNÉCOLOGUES DU CANADA

INTRODUCTION | TABLE OF CONTENTS

Introduction

This document was created by the SOGC Resident Committee's Postgraduate subcommittee with the goal of assisting postgraduate trainees in ob/gyn with navigating the fellowship training options in Canada. This document is a work in progress and will be updated periodically. If you have any questions, corrections, or additions that you would like to make to this document, please email ceverest@sogc.com.

CONTRACEPTION/ FAMILY PLANNING

CONTRACEPTION/FAMILY PLANNING

University/Location	University of British Columbia (Vancouver)
Program Title:	Family Planning (Advanced Training Program)
Program Co-Directors:	Dr. Brian Fitzsimmons, MD, FRCSC, FACOG
Program Assistant:	Chriselle Serne
Program Assistant Email Address:	chriselle.Serna@cw.bc.ca
Mailing Address:	BC Women's Hospital C420-4500 Oak Street Vancouver, BC V6H 3N1
Telephone:	604-875-6809 (Program Assistant)
Website:	www.obgyn.ubc.ca/education/advanced-training-programs/family-planning
Positions:	1
Application due date:	Unknown
Funding/Salary Year:	Determined yearly
Length of Program:	1 year
Additional Degrees:	Not required
Short Description of Program:	<p>This program provides post-graduate obstetricians and gynaecologists the opportunity to focus on comprehensive family planning training, including advanced abortion care and contraception, as well as training in research methodologies.</p> <p>This program involves both didactic and clinical training to achieve competencies in the following areas:</p> <ul style="list-style-type: none"> • Family planning services, including complex contraception • 1st and 2nd trimester medical and surgical abortion (hospital and community based) • Early pregnancy assessment (EPAC) • Maintenance and expansion of generalist OB & GYN skills (hospital and community based) • Research skills (participation in ongoing research or clinical protocol development) • Advocacy • Teaching • Clinical leadership <p>This program is closely aligned with the Fellowship in Family Planning based at the UCSF Bixby Centre for Global Health.</p> <p>Clinical activities are primarily housed at BC Women's Hospital, Vancouver General Hospital and affiliated clinics. As we are the regional centre for advanced family planning, we have a high clinical volume that provides excellent teaching opportunities. We have a committed teaching faculty as well as a robust and active research program to ensure a high-quality learning experience.</p>

CONTRACEPTION/FAMILY PLANNING

University/Location	Queen's University/Kingston, Ontario
Program Title	Contraceptive Advice, Research, and Education (CARE) Fellowship
Program Director	Dr. Ashley Waddington
Mailing Address	Kingston General Hospital, Victory 4 76 Stuart Street Kingston, Ontario K7L2V7
Telephone/Fax	(phone)613 548 6069 (Fax) 613 548 1330
Website	https://obgyn.queensu.ca/academics/care-fellowship
Email	ashley.waddington@queensu.ca
Positions	1
Application due date	Unknown
Funding/Salary Year 1	"Competitive"
Length of Program	1
Additional Degrees i.e:Masters	Not required
Short Description of Program	<p>Successful applicants will participate in an active program of clinical activity and research, to further their knowledge and skills in the management of complex contraceptive problems, and develop innovative educational programs to promote effective and safe utilization of contraceptives available in Canada.</p> <p>Fellows regularly participate in Pediatric and Adolescent Gynecology Clinics and a Multidisciplinary Teen Ob clinic, which allows the opportunity to gain expertise in working with adolescents and young adults. Fellows have the option to participate in a multidisciplinary Transgender Health clinic during the Fellowship. Research activities will be developed in the area of interest of the specific applicant and will be supervised by members of the division of Reproductive Endocrinology and Infertility.</p> <p>Clinical activities will involve participation and ultimately supervision, at a junior faculty level, of:</p> <ul style="list-style-type: none"> • Special clinics for challenging contraceptive cases. • Clinics dealing with management of contraceptive failure and /or STIs. • ORs for provision of surgical sterilization and other contraception-related procedures • Teaching rounds and visiting professorships in this area. <p>The fellow will develop expertise as an effective communicator about contraceptive issues through participation in CHE and public forums on contraception and reproductive health. Competitive salary, benefits, and travel allowance provided.</p> <p>Fellows participate in the general Ob/Gyn call schedule as attending staff, which helps to maintain general skills in Ob/Gyn and develop confidence as an academic attending physician.</p>

GLOBAL WOMEN'S HEALTH

GLOBAL WOMEN'S HEALTH

University/Location	University of Toronto
Program Title	Global Women's Health and Equity Fellowship
Program Director	Dr. Rachel Spitzer
Contact	Joe George
Mailing Address	
Telephone/Fax	416-946-0306 (Joe George)
Website	Global Women's Health and Equity Department of Obstetrics and Gynaecology (utoronto.ca)
Email	Joseph.george@utoronto.ca
Positions	
Application due date	July 1 st of each year
Funding/Salary Year 1	
Length of Program	2 years
Additional Degrees i.e: Masters	
Short Description of Program	A minimum 12 months of clinical rotations will be completed in Canada throughout the fellowship training, with the majority taking place within the greater Toronto area. Rotations will focus on areas of practice that are relevant to the understanding and clinical care of underserved and marginalized women in Canada, or to enhance skills needed to practice in resource poor settings. Fellows will be encouraged to complete between 9-12 months (as a single or multiple placements) as a <u>Team Leader</u> in Eldoret, Kenya under the supervision of a local AMPATH faculty member, in collaboration with the AMPATH Consortium. Placements in other locations can be discussed on a case-by-case basis with individual fellows. The Fellow will provide a monthly seminar on Women's Health topics at Christie Refugee Welcome Centre, a Toronto organization that provides temporary shelter and a safe haven for refugee families from all ethnic, racial and religious backgrounds. Opportunities for development of novel partnerships and outreach are also available. Protected time will be provided to conduct research. The breakdown of the program will be 70% clinical and 30% research. Fellows will be expected to participate in both ongoing research projects locally and within AMPATH, as well as initiate new projects.

GYNECOLOGIC ONCOLOGY

GYNECOLOGIC ONCOLOGY

University/Location	University of British Columbia
Program Title	Gynaecologic Oncology
Program Director	Dr. Harinder Brar
Program Director Email Address	Harinder.brar@vch.ca
Program Assistant	Annalyn Cumaual
Program Assistant Email Address	Annalyn.Cumaual@vch.ca
Mailing Address	2775 Laurel Street, 6th Floor Vancouver, BC V5Z 1M9
Telephone	604.875.4417
Website	www.obgyn.ubc.ca/education/fellowships/gynecologic-oncology
Positions	1
Application due date	July 29, 2022
Funding/Salary Year	PGY 6 and 7 salaries, as per Resident Doctors of BC remuneration schedule
Length of Program	3 years
Additional Degrees	Not associated with the program directly, but most fellows choose to pursue a third year for a Master's in Public Health
Short description of program	The Fellowship in Gynaecologic Oncology is a fully accredited three-year subspecialty program, where third year is dedicated for research, through the Royal College of Physicians and Surgeons of Canada. The clinical program has a large volume of radical surgery as well as minimally invasive surgical procedures, multidisciplinary clinics and rounds, and a formal teaching curriculum offered through weekly academic half day sessions, multidisciplinary tumour board meetings, oncology academic rounds, and journal club meetings. British Columbia has a population-based cancer control organization, and cancer care is standardized across the province. This provincial cancer program is the ideal platform upon which to conduct teaching and research. Our multidisciplinary affiliations with pathology, medical and radiation oncology, urology, general surgery, plastic surgery, and the BC Cancer Agency Hereditary Cancer Program contribute to a tremendous clinical and research experience for our trainees.

GYNECOLOGIC ONCOLOGY

University/Location	University of Calgary
Program Title	Gynecology Oncology
Program Director	Dr. Prafull Ghatage, MB, FRCS
Program Director email	Prafull.Ghatage@ahs.ca
Program Administrator	Judi Degelman
Program Administrator email	judi.degelman@albertahealthservices.ca
Mailing Address	Tom Baker Cancer Centre 1331 29 th Street NW Calgary, Alberta T2N 4N2
Telephone/Fax	(403) 521 3775 (Program Administrator)
Website	http://departmentofoncology.com/education-training/residency/gynecologic-oncology/
Positions	2
Application due date	September 7 th
Funding/Salary Year 1	As per The Professional Association of Resident Physicians of Alberta (PARA)
Length of Program	2 years
Additional Degrees i.e:Masters	
Short Description of Program	<p>The first year is spent in clinics, on the ward, looking after admissions, which includes chemotherapy, postoperative patients and palliative care patients. There is a rotation in colposcopy and a minor surgery list weekly. There is an 8 week rotation in radiation oncology and medical oncology. The rest of the time is spent either in surgical oncology, colorectal surgery, and palliative care. It is possible to have one or two blocks for research.</p> <p>Most of the second year is spent focused on gynecologic oncology surgery and in assessing and treating chemotherapy patients. The focus during the second year is to develop appropriate skills in diagnosing and managing patients with various gynecologic malignancies. This includes pelvic reconstruction, and radical laparoscopic surgery.</p>

GYNECOLOGIC ONCOLOGY

University/Location	Université Laval
Program Title	Gynécologie Oncologique
Program Director	Dre Alexandra Sebastianelli

Positions	1
Application due date	Le 1er juillet de l'année précédente
Funding / Salary Year 1	Salaire de résident VI si candidat canadien. Sinon, le candidat doit avoir sa propre source de financement
Length of Program	2 ans
Additional Degrees i.e : Masters	-
Short Description of Program	<p>Le programme de fellowship en oncologie gynécologique s'effectue principalement à L'Hôtel-Dieu de Québec (HDQ) du CHU de Québec. Il s'agit d'un hôpital dont la mission première est l'oncologie. L'Équipe de gynécologie oncologique de l'HDQ compte 4 gynécologues oncologues (un 5e est attendu en septembre 2016).</p> <p><u>Aspect chirurgical</u></p> <p>Nous comptons sur un volume et un bassin de références très vaste (tout l'est du Québec). Plus de 700 patientes par année sont opérées dans notre service pour des cancers gynécologiques ou pour des problématiques gynécologiques complexes. Nous disposons de 5 à 6 priorités opératoires par semaine et d'une unité chirurgicale active en terme de nombre de lits. Notre équipe est reconnue pour son activité chirurgicale novatrice : chirurgie laparoscopique invasive, chirurgie radicale par voie vaginale (trachélectomie), technique du ganglion sentinelle, etc. Nous disposons également d'un robot chirurgical depuis 2012. Nous sommes également appuyés par une solide et compétente équipe de chirurgiens oncologues et d'urologues oncologues et d'une pathologiste spécialisée et dédiée à la gynécologie oncologique.</p> <p><u>Cliniques externes et colposcopie</u></p> <p>Nous avons un service ambulatoire en oncologie très actif avec plus de 5 400 visites et 630 nouvelles consultations par année. De plus, vous aurez accès à la clinique de colposcopie comportant une importante référence de colposcopies tertiaires (cas complexes, laser extensif, anuscopie haute résolution, etc). La clinique reçoit plus de 3 200 visites et près de 600 nouveaux cas par année.</p>

GYNECOLOGIC ONCOLOGY

University/Location	University of Manitoba (Winnipeg, MB)

Program Director	Dr. Shaundra Popowich, MD, MBA, FRCSC
Program Director Email	spopowich@cancercare.mb.ca
Telephone	204 787-1988
Website	www.umanitoba.ca/faculties/health_sciences/medicine/units/obstetrics_gynecology/gynecologic_gyne_fellowship.html
Positions	1
Application due date	June 1
Funding/Salary Year	Unknown
Length of Program	2 years
Additional Degrees	N/A
Short Description of Program	<p>Enhance your skills in all aspects of care for women with pre-malignant and malignancies of the reproductive tract in this comprehensive two-year program. Work alongside faculty members who provide clinical care in two tertiary care hospitals, as well as other hospitals and private locations across Manitoba including referrals from Western Ontario.</p> <p>Rich educational and research opportunities</p> <ul style="list-style-type: none"> - In the hospital and the community, work with a team providing evidence-based care and services to women at all stages of life. - Engage with academic faculty who facilitate education and research in an environment that fosters creativity and innovation. <p>Historical excellence</p> <ul style="list-style-type: none"> - This program was founded in 1981 by Dr. Garry Krepart. It has provided the foundational inception for specialists who have left to advance the discipline globally, from South America to the Middle East. <p>Medical innovation</p> <ul style="list-style-type: none"> - The program continues on its tradition, aspiring to support the growth of new trailblazers through training that provides exposure to all aspects of care for women with gynecologic malignancies.

GYNECOLOGIC ONCOLOGY

University/Location	McGill University/ Montréal (RVH & JGH)
Program Title	Gynecologic Oncology (<i>subspecialty residency program</i>)
Program Director	Dr. Fady Mansour
Mailing Address	Hôpital Royal Victoria, Bureau D05.2571 1001 boulevard Décarie, Montréal, Québec H4A 3J1
Telephone/Fax	514-934-1934 ext. 34502 (Program Administrator)
Website	https://mcgill.ca/obgyn/education/postgraduate-medical-education/subspecialty-residency-programs/gynecologic-oncology
Email	obgyn.pgme@mcgill.ca
Positions	1-2 per year
Application due date	May 1, 2020
Funding/Salary Year 1	Depends on the type of funding
Length of Program	2 years
Additional Degrees i.e: Masters	
Short Description of Program	<p>Under the direct supervision of the faculty, trainees will be responsible for the care of patients referred to the service and will have ample opportunity to achieve clinical competence in all aspects of the diagnosis and management of pre-invasive and invasive gynecological malignancies. Trainees will receive training in the preoperative assessment of high-risk patients and in the post-operative care of these patients. They will be trained in the full range of surgical procedures for the treatment of pre-invasive and invasive gynecological cancers, including laser surgery of the lower genital tract, radical oncological surgery using laparotomy, laparoscopy and robotics.</p> <p>Research is an integral part of the residency program. Trainees are expected to present their work at a National or International Scientific Meeting and publish their work in a peer-reviewed journal. Throughout the program, trainees are expected to participate in the teaching of medical students, residents, general gynecologists and other health care professionals.</p>

University/Location	Université de Montréal / Montréal

Email	sandra.charland.chum@ssss.gouv.qc.ca
Positions	
Application due date	
Funding/Salary Year 1	66 069 \$ (R6)
Length of Program	2 ans
Additional Degrees i.e:Masters	-
Short Description of Program	Le programme de gynécologie oncologique de l'Université de Montréal est de 2 ans (26 périodes) avec possibilité d'une année de recherche (clinique et/ou fondamentale). Le programme est organisé en stages obligatoires et optionnels conçus pour satisfaire les objectifs éducatifs décrits dans les normes et objectifs de formation de la surspécialité de gynécologie oncologique du Collège Royal. L'enseignement aux fellows se fait quotidiennement, tant en salle d'opération qu'en clinique et au chevet des patientes. Il existe aussi sur une base hebdomadaire des périodes d'apprentissage plus encadré: réunion du Tumor Board de gynécologie oncologique (1h/sem), réunion de radiologie pour revoir l'imagerie des cas complexes du service (1h/sem), réunion d'enseignement multidisciplinaire pour le service (1h/sem), et une séance d'enseignement didactique spécifiquement pour les fellows (1h/sem).

GYNECOLOGIC ONCOLOGY

University/Location	University of Ottawa
Program Title	Gynecologic Oncology
Program Director	Dr. Constance Ling, MD, FRCSC
Program Coordinator	Erica Moore
Mailing Address	
Telephone/Fax	613-737-8899 ext. 73254
Website	Gynecologic Oncology Department of Obstetrics and Gynecology University of Ottawa (uottawa.ca)
Email	emoore@toh.ca
Positions	
Application due date	June prior to commencement of fellowship program on July 1 st of the following academic year
Funding/Salary Year 1	
Length of Program	2 years with an optional 3 rd year for research or robotic surgery training
Additional Degrees i.e: Masters	
Short Description of Program	<p>The first year of training focussed mainly on the care of the critically ill medical and surgical patients and to achieve core competencies in gynaecologic oncology. Formal instructions will also be given in research methodology and critical appraisal skills by didactic lecture series and real world application through regular journal club and mortality and morbidity round presentations. The residents will be expected to fully integrate themselves into the multidisciplinary model of care environment and to function as leader within the team under the supervision of attending staffs.</p> <p>The second year consisted of 5 months in non gynaecologic oncology rotations. This includes 2 months of medical oncology, 2 months of radiation oncology and one month of elective time. The remaining time (7 months) will be done in gynaecologic oncology where the resident will assume the role of a junior consultant gynecologic oncologist.</p>

University/Location	University of Toronto
Program Title	Gynecologic Oncology
Program Director	Dr. Stephanie Lafranboise
Mailing Address	Princess Margaret Cancer Center 610 University Avenue, M700 Toronto, ON, Canada, M5G 2M9
Telephone/Fax	(416) 946-4043
Website	http://www.obgyn.utoronto.ca/gynaecologic-oncologyrcpsc
Email	Grezafe.lacanlale@uhn.ca
Positions	2
Application due date	March 29 th to start the following July
Funding/Salary Year	
Length of Program	2 years
Additional Degrees ie Masters	Yes
Short Description of Program	<p>The size of our University Division provides fellows with an ideal environment for experiencing the practice of Gynaecologic Oncology in an academic environment. The relatively large number of staff Gynaecologic Oncologists (9) affiliated with the Program provides fellows with a range of academic interests and clinical practices that facilitate the development of varied clinical skills, critical thinking, and multiple perspectives on the practice of Gynaecologic Oncology. Due to the large volume of both surgical and non-surgical cases seen annually by members of the Division of Gynaecologic Oncology at the University of Toronto, based at two tertiary-care referral centres for women with gynaecologic malignancies in Ontario, Canada, fellows in our Program are afforded a high level of clinical exposure to the range of malignancies managed by Gynaecologic Oncologists. The large clinical volume also facilitates the performance of clinical research by fellows during their training period.</p> <p>The third ("academic") year of our Program also provides fellows with a unique opportunity to develop skills vital to their ultimate successful practice in an academic centre, which remains our model for the ideal practice of Gynaecologic Oncology in Canada. In no other Canadian Fellowship Training Program are fellows provided with this "protected" environment to foster the development of these vital skills.</p>

MATERNAL FETAL MEDICINE

MATERNAL FETAL MEDICINE

University/Location	University of British Columbia (Vancouver)
Program Title	Maternal Fetal Medicine
Program Director	Dr. Francine Tessier, MD, FRCSC
Senior Program Assistant	Chriselle Serna
Senior Program Assistant Email Address	chriselle.serna@cw.bc.ca
Mailing Address	Division of Maternal Fetal Medicine BC Women's Hospital C420-4500 Oak Street V6H 3N1
Telephone	
Website	www.obgyn.ubc.ca/education/fellowships/maternal-fetal-medicine
Positions	1
Application due date	May 27th 2022
Funding/Salary Year	PGY 6 and 7 salaries, as per Resident Doctors of BC remuneration schedule
Length of Program	2 years
Additional Degrees	Not required
Short description of program	<p>This program provides advanced training in high risk obstetrics and prenatal diagnosis, with excellent clinical exposure and supervised experience in all aspects of the subspecialty. Fellows are expected to participate in basic science and/or clinical research projects. Protected academic time is provided and teaching in research methodology, statistics, and study design is offered. In preparation for becoming an academic physician, formal instruction is offered in how to teach in the clinical setting and participation in multidisciplinary/interprofessional committees is encouraged.</p> <p>The program is based at BC Women's Hospital (BCWH) in Vancouver, British Columbia. This is a 95 bed maternity hospital that delivers both primary and secondary level obstetrical care to the Greater Vancouver area and tertiary/quaternary level care to the province of British Columbia and the Yukon.</p>

MATERNAL FETAL MEDICINE

Funded training positions for 2021/2022:	1-2
Application due date for 2021/2022:	June 30
Funding/Salary Year:	
Length of Program:	2 years
Additional Degrees:	N/A
Short Description of Program:	<p>Our program is centered at two tertiary care facilities in the city of Winnipeg, Women's Hospital and St Boniface Hospital. These centres are responsible for a combined 11 000 deliveries per year and serve a catchment area that includes Manitoba, Nunavut and Northern Ontario.</p> <p>Located in the heart of the prairies, Winnipeg is the capital of Manitoba with approximately 720,000 inhabitants. As a multicultural urban centre, Winnipeg boasts a prolific arts/music and entertainment scene, multiple sports teams (Winnipeg Jets, Blue Bombers and Goldeyes), diverse restaurant experiences, and access to year-round outdoor activities. The winters are cold, the summers are hot and the mosquitoes will get you – but Winnipeg is consistently known as one of the most affordable cities in Canada.</p>

MATERNAL FETAL MEDICINE

University/Location	McGill University/ Montréal (RVH & JGH)
Program Title	Maternal Fetal Medicine (<i>subspecialty residency program</i>)
Program Director	Dr. Anne-Maude Morency
Mailing Address	Hôpital Royal Victoria, Bureau D05.2571 1001 boulevard Décarie, Montréal, Québec H4A 3J1
Telephone/Fax	T: 514-934-1934, ext. 34669
Website	https://mcgill.ca/obgyn/education/postgraduate-medical-education/subspecialty-residency-programs/maternal-fetal-medicine
Email	obgyn.pgme@mcgill.ca
Positions	
Application due date	Unknown
Funding/Salary Year 1	Depends on the type of funding
Length of Program	2 years
Additional Degrees i.e:Masters	Must have training in an Obstetrics and Gynaecology Residency Program to apply
Short Description of Program	<p>Trainees manage patients in the Birthing Centre, Perinatal Unit, Outpatient Antenatal Centre, and Women's Ultrasound Department. Patients are referred from multiple hospitals across the McGill RUIS - a catchment area of approximately 10,000 live births per year - for various medical complications in pregnancy, suspected fetal abnormalities, genetic issues, preterm labor, and maternal or fetal problems requiring ongoing fetal surveillance.</p> <p>Training occurs at 2 main teaching hospitals (the Royal Victoria Hospital and the Jewish General Hospital), providing ample opportunities to achieve clinical competence in the management of women with complications of pregnancy. MFM trainees attend and participate in weekly Perinatal Rounds and the bi-monthly Fetal Diagnosis and Treatment Videoconferences and are exposed to fetal therapy. In addition, trainees design and execute a research project in a clinical or basic science area, with the support and supervision of attending staff.</p>

MATERNAL FETAL MEDICINE

University/Location	McMaster/Hamilton
Program Title	Maternal Fetal Medicine
Program Director	Dr. Sapna Sharma
Mailing Address	Attn: Heather Shiskoski 1280 Main St W, HSC 4D9 Hamilton, ON L8S 4K1
Telephone/Fax	905-521-2100 ext 76204
Website	https://obsgyn.mcmaster.ca/education/fellowship-programs/maternal-fetal-medicine

Positions	1-2 per year
Application due date	July 30, 2022
Funding/Salary Year 1	
Length of Program	2 years
Additional Degrees i.e: Masters	Not required
Short Description of Program	The fellowship program is a two-year program fully certified by the Royal College of Physicians and Surgeons of Canada. We have the capability of accepting up to two fellows per year. Fellows have intensive time in clinical MFM, prenatal diagnosis, as well as neonatology, pathology and obstetrical medicine. There are also blocks of elective time which occur in both first and second year. Commonly this is used to join the Toronto fetal therapy group but other experiences would also be encouraged. Another key element to any MFM fellowship program is ultrasound. McMaster Ultrasound provides obstetrical ultrasound services to a large number and wide variety of healthy and complex, high risk obstetrical patients from LHINs 3 and 4. We see a high volume of fetal anomalies. Techniques provided in the unit include two dimensional (grayscale, Doppler) and 3D/4D dimensional scanning/reconstruction and invasive procedure guidance (amniocentesis and CVS). For appropriate candidates, we can also provide flexibility to complete additional training concurrently with the fellowship, such as the Clinician Educator Program or a Masters in Health Research Methodology, as recent fellows have done.

Length of Program	1 year
Additional Degrees i.e: Masters	
Short Description of Program	<p>The Advanced Obstetric & Gynecology Ultrasound Fellowship is designed to further increase the depth of knowledge and clinical expertise in fetal medicine and ultrasound as well as to continue to refine research goals and develop consultative, leadership and managerial skills for the wider obstetrical and maternal fetal medicine community. This program is structured to train individuals who have successfully completed a Royal College accredited Maternal-Fetal Medicine subspecialty residency program or International Graduates of other approved and equivalent Maternal-Fetal Medicine programs. This is a one-year program leading to certification in advanced obstetrical ultrasound that will be based in the Women's Ultrasound Unit at the MUHC (Royal Victoria Hospital) and the Fetal cardiology unit at the MUHC (Montreal Children's Hospital).</p> <p>The trainee will also become increasingly acquainted and competent in the management of complications of pregnancy, ultrasound, diagnostic techniques and invasive procedures. The trainee will be an active participant in the academic activities of the maternal-fetal medicine division including regular rounds, seminars and journal clubs. In addition, throughout the course of the one-year training program, the trainee will design and execute a research protocol in a clinical or basic science area under the supervision of an attending staff member.</p>

MATERNAL FETAL MEDICINE

University/Location	McGill University / Montréal/ Royal Victoria Hospital

Email	obgyn.pgme@mcgill.ca
Positions	1-2 per year
Application due date	Unknown
Funding/Salary Year 1	Depends on the type of funding
Length of Program	1 years
Additional Degrees i.e:Masters	
Short Description of Program	Maternal-Fetal Medicine specialists are physicians trained in the prevention, diagnosis and treatment of those conditions implicated in the morbidity and mortality of the mother, fetus and early newborn. Fetal Medicine deals with aspects of prenatal fetal diagnosis and treatment. This incorporates prenatal screening (ultrasound, serum and genetic based testing) and prenatal diagnosis (imaging and invasive testing based). A significant component of prenatal diagnosis deals with screening for fetal aneuploidy as well as evaluation of various genetic syndromes or genetically mediated conditions. Although many prenatal diagnostic centers work in conjunction with clinical geneticists it is still of value for the maternal fetal medicine specialist to understand the core principles of genetic diagnosis and testing. A component of this is included within the core modules of the Maternal-Fetal Medicine Subspecialty Residency program but there are some trainees who wish to expand their knowledge of genetics, prenatal screening, prenatal diagnosis and prenatal counseling and this 1 year program is designed to increase their exposure to clinical medical genetics and genetic counseling to enhance upon the skills that would be gained during a typical MFM fellowship.

Positions	
Application due date	June prior to commencement of fellowship program on July 1 st of the following academic year
Funding/Salary Year 1	
Length of Program	
Additional Degrees i.e: Masters	
Short Description of Program	Sub-specialization within Obstetrics and Gynecology has developed over the last two decades. With increasing sophistication in fetal imaging and the ability to observe the intrauterine environment, the concept of the fetus as a patient was born. Concomitant with the explosion in technologies for prenatal diagnosis and medical and surgical fetal therapy came the need for an obstetric perinatologist or fetal physician. Such an individual, by definition, would require a firm grounding in physiology and pathophysiology of the fetus and would be prepared to address, through scientific enquiry, some of the unresolved dilemmas in perinatal medicine. The role of the Maternal-Fetal Medicine (MFM) specialist, or perinatologist, has developed as complementary to that of the obstetrician and in current practice the job description also encompasses the tasks of administration, education and fetal advocate. In this country, where regionalization perinatal care has been shown advantageous, with improved outcome and lowered health care costs, the obstetric perinatologist will be found in academic tertiary level centers. These individuals have clinical practices limited to care of the high-risk mother and her fetus.

Additional Degrees i.e:Masters	
Short Description of Program	<p>Thank you for your interest in pursuing training in Pregnancy Obesity Medicine and Surgery (POMS) at Sinai Health. Obesity (defined as BMI Class 3 or greater for the purposes of this Fellowship) represents a health status that may be associated with medical and surgical problems, and as a result may impact the care and outcome of pregnancy and birth. Obesity Medicine represents a new medical discipline with a focus on evaluation, care and treatment of obesity-related health conditions. You may consider training in POMS if your obstetrical practice does or will have aspects of medical care of pregnant patients affected by obesity. You may also wish to gain more experience in birth planning and coordination of the health care team for surgical planning around complex Caesarean birth.</p> <p>This Clinical Fellowship program can be organized to meet your learning objectives.</p> <p>Fellowship duration is 6-12 months.</p> <p>This program is committed to high quality, equitable care for people with obesity, with attention to the effects of weight stigma, bias and discrimination have on health care.</p> <p>This program is committed to considering candidates from diverse backgrounds as well as under-represented and/or equity seeking groups including Black people; Indigenous communities; people who are differently abled or with disabilities; LGBTQ2S+ communities; and people who promote Allyship within the broader community.</p>

Length of Program	1-2 year
Additional Degrees i.e:Masters	
Short Description of Program	<p>Complex Obstetric Surgery is within the field of Obstetrics & Gynecology concerned with the diagnosis, management and treatment of complex obstetric surgery in pregnancy. The Fellowship is based primarily at Mount Sinai Hospital, a high-volume leading tertiary-level obstetric care facility in Toronto. Secondments are to Credit Valley Hospital (Trillium Health Partners) through longitudinal modules in advanced gynaecological surgery.</p> <p>Upon completion of training, the Fellow is expected to be a competent specialist in Complex Obstetric Surgery, capable of assuming the role of consultant. The Fellow must acquire a working knowledge of the theoretical basis of the specialty, including its foundations in the basic medical sciences and research. The Complex Obstetric Surgery consultant possesses the appropriate medical, surgical and obstetrical knowledge and skills with educational and research interests, administrative ability and special training in the identification and management of complex obstetric surgical problems. Specialists in Complex Obstetric Surgery are consultants to their general Obstetrician colleagues and related health care providers. Their practice is focused on referred high risk obstetric surgery patients, and to provide ambulatory emergency assistance to colleagues when required in their respective centers.</p>

Application due date	July 1 st
Funding/Annual Salary	
Length of Program	1 year
Additional Degrees i.e:Masters	
Short Description of Program	<p>The objective of this fellowship is to train a specialist in the maternal and fetal aspects of High-Risk Obstetrics with skills and expertise to function as a consultant for general obstetricians and physicians from other disciplines that deal with complicated pregnancies. The trainee will obtain the skills to diagnose complicated pregnancies and to manage these pregnancies with other specialists (such as anesthetists and neonatologists) and care-providers from other disciplines. The specialist in High-Risk Obstetrics is expected to be able to function in a tertiary centre and to have the relevant administrative and academic responsibilities of a specialist in such a centre.</p> <p>This 1 year fellowship in Obstetrics and Gynecology includes hands-on training in the diagnosis and management of high-risk pregnancies with a special focus on Obstetric ultrasound.</p> <p>Upon successful completion of training, the fellow will demonstrate the following:</p> <ul style="list-style-type: none"> • Knowledge of basic sciences and the clinical sciences as applied to Maternal-Fetal medicine, understanding of the different research areas in the field and the methodology applied to these areas. The fellow should have the ability to learn and to acquire new skills and apply them to practice. • The clinical skills of history taking, physical examination, laboratory test interpretation, ultrasound diagnosis, and genetics as applied to High-Risk Obstetrics. Through collaboration with the other Maternal Fetal Medicine units in the University of Toronto (Mt. Sinai and Sunnybrook), to perform and /or observe advanced diagnostic and therapeutic fetal

MATERNAL FETAL MEDICINE

	<p>procedures such as amniocentesis, CVS, amnio reduction, fetal blood sampling and laser ablation of placental anastomoses.</p> <ul style="list-style-type: none">• The ability to manage patients with complex medical and surgical diseases as well as patients with major obstetrical problems and fetal diseases and anomalies. To be able to provide comprehensive care in concert with other specialists and care providers. To be able to provide care in consultation antenatally as well as intrapartum and to provide prenatal diagnosis, fetal assessment and therapy.• Have empathic and sensitive attitudes to patients, their families and other members of the medical team. To incorporate ethical approach to clinical problems. To develop communication skills enabling discussion of complex issues with patients and families as well as the ability to present complex patients and issues formally as presentation and informally to colleagues.• Have an understanding of the organization of advanced obstetrics on all its levels (national, provincial, regional and hospital based) and to be able to take part in planning and administration of perinatal care.• Formulate a relevant scientific clinical question and transform it into a research plan. The fellow will acquire the relevant laboratory or research tools needed to execute this research, perform the research and analyze the data obtained in a meaningful fashion resulting in scientific publication.

Positions	1-2/year
Application due date	June 30th
Funding/Salary Year 1	PGY6-7 salary level per Ministry of Health Guidelines for Canadian Trainees
Length of Program	2 years
Additional Degrees i.e: Masters	Opportunity for completion of Masters degree
Short Description of Program	This program is accredited, without certification, by the Royal College of Physicians and Surgeons of Canada. The accepted candidate will receive training over a 2-year period in all aspects related to Maternal-Fetal Medicine. After completion of the program, a certificate will be issued by Western University recognizing that the candidate has completed training in Maternal-Fetal Medicine. Research opportunities are numerous and involve both basic science and clinical research projects with members of the Maternal-Fetal Medicine Division. Faculty members conduct strong research programs which are recognized at national and international levels. Our tertiary care perinatal program has a referral-based population consisting of approximately 1.5 million people from Southwestern Ontario with approximately 6,000 deliveries per year in London. This provides ample clinical material for trainees. A comprehensive, unique, perinatal database, which has been collected over the past 20 years is available to be used for Continuous Quality Assurance, audit and clinical epidemiological studies.

Vous connaîtrez également les principes de nettoyage et de stérilisation des équipements pour éviter la transmission des infections · développer vos connaissances techniques des procédures et équipements, des coûts se rattachant à l'achat des appareils et des accessoires. Vous pourrez éventuellement mettre sur pied les techniques d'hystérocopie ambulatoire dans un nouveau milieu le cas échéant <p>Expertise médicale :</p>	

MINIMALLY INVASIVE GYNAECOLOGY

- acquérir une compréhension de l'anatomie descriptive et fonctionnelle des structures suivantes : le pelvis incluant ses structures osseuses, ses muscles, sa vascularisation et son innervation, la paroi abdominale, les organes abdominaux et pelviens, les espaces rétropéritonéaux incluant les espaces pré-vésical, para-vésical, vésicovaginal, pararectal et pré-sacré, le tractus génito-urinaire incluant le trajet des uretères et l'étiologie embryonnaire des organes pelviens en relation avec les anomalies congénitales
- comprendre des principes, indications, contre-indications, avantages et limites de l'hystéroscopie diagnostique et de la vaginoscopie dans un contexte ambulatoire et anticiper les complications reliées à ces techniques
- maîtriser des instruments utilisés en hystéroscopie diagnostique dont la source de lumière, la vidéo-caméra, les principes optiques de l'endoscopie, l'équipement utilisé pour la saisie d'images, de vidéo, les chemises diagnostique et opératoire, l'hystéroflateur de gaz carbonique, l'irrigation au salin et l'usage de la pince alligator
- comprendre les éléments suivants de l'hystéroscopie opératoire :
 - o les systèmes d'irrigation et de distension de la cavité utérine, les principes biophysiques de l'instrumentation intra-utérine à base d'énergie, le fonctionnement et l'utilisation du résectoscope, l'instrumentation utilisée pour accéder à la cavité utérine
 - o l'instrumentation utilisée pour la section, la résection et l'ablation des tissus
 - o la résolution des problèmes reliés au fonctionnement des équipements
 - o l'organisation dans la salle d'opération
 - o les indications, risques et bénéfices de l'hystéroscopie opératoire
 - o les indications, méthodes et complications reliées à l'ablation de l'endomètre, à la myomectomie, à la métroplastie, à la lyse de synéchies et à la stérilisation
 - o les types d'anesthésie utilisés en hystéroscopie opératoire
 - o les besoins spécifiques à l'hystéroscopie opératoire en clinique ambulatoire
- reconnaître et maîtriser les problèmes et complications en lien avec les situations suivantes : positionnement de la patiente, accès à la cavité utérine et perforation, saignement actif, brûlure thermique, milieu de distension, embolie gazeuse, substances anesthésiques, thrombo-embolie, infection postopératoire et hématométrie.
- être en mesure d'effectuer les techniques et chirurgies hystéroscopiques suivantes : hystéroscopie diagnostique, vaginoscopie, bloc paracervical, sédation intraveineuse, biopsie orientée, extraction de stérilet, polypectomie, ablation de l'endomètre par rollerball, ablation de l'endomètre par technique globale, résection de l'endomètre par résectoscope, myomectomie, lyse de synéchies, métroplastie, stérilisation hystéroscopique
- avoir une compréhension des principes, avantages, limites et complications de la laparoscopie diagnostique et opératoire et avoir la compréhension et la capacité de prévenir et reconnaître les problèmes et complications possibles
- comprendre ou effectuer les techniques et chirurgies laparoscopiques requises pour les pathologies de la grossesse ectopique, stérilisation permanente, saignement utérin anormal, fibrome utérin, douleur pelvienne chronique, masse annexielle : kystectomie, drainage d'abcès tubo-ovarien, néosalpingostomie distale pour hydrosalpinx, salpingectomie, ovariectomie, salpingo-ovariectomie, approche laparoscopique durant la grossesse et approche laparoscopique d'une masse suspecte
- comprendre l'endométriose sous les aspects de la pathogénèse, la symptomatologie, l'apparence visuelle et la classification de l'endométriose
- maîtriser les techniques pour traiter l'endométriose : les options médicales et chirurgicales, l'ablation et la destruction des lésions d'endométriose peu importe le stade, urétérolyse, kystectomie ovarienne et ovariectomie pour endométriose, prise en charge du comblement du cul-de-sac de Douglas, prise en charge de l'endométriose impliquant la vessie, l'uretère, le tractus gastro-intestinal

MINIMALLY INVASIVE GYNAECOLOGY

et le diaphragme, neurectomie pré-sacrée, place de la déperitonisation, principes et techniques de la lyse d'adhérences, utilisation de barrières anti-adhérences, conséquences de l'excision de l'endométriose, hystérectomie totale.

Érudition :

- demeurer critique par rapport aux nouvelles techniques applicables en laparoscopie et en hystéroscopie. Vous aurez le souci de revoir les données probantes de la littérature médicale afin de décider si ces innovations sont dignes d'être appliquées dans le cadre de votre pratique médicale
- enseigner les techniques que vous pratiquez aux résidents juniors en stage
- veiller au suivi des prélèvements que vous effectuez afin d'obtenir une rétroaction sur la qualité de vos techniques
- discuter des techniques et de la qualité des prélèvements cytopathologiques
- préparer un cours d'endoscopie gynécologique hebdomadaire pour les résidents et les externes

Email	emoore@toh.ca
Positions	
Application due date	Submitted to the AAGL by July 1 st
Funding/Salary Year 1	TBD (opportunity for locum call available)
Length of Program	2 years
Additional Degrees i.e: Masters	
Short Description of Program	<p>The fellowship program in minimally invasive gynaecology has been developed to provide an opportunity for concentrated exposure and additional training for the next generation of OB/GYN graduates who wish to provide advanced surgical care in an academic and clinical setting. The fellows will receive sub-specialty training and technical competency in sophisticated gynaecological endoscopic procedures that can be used for treatment of complex benign gynaecologic conditions.</p> <p>The program directly addresses the concerns of graduating OB/GYN trainees and program directors, which state that further training opportunities are required in operative laparoscopy, hysteroscopy, and advanced pelvic surgery (Raymond et al, JMIG 2005). The curriculum has been designed to contain two portions; an extensive clinical section and an advanced surgical education component, permitting the fellows to effectively develop a strong foundation within academic gynaecologic surgery.</p>

MINIMALLY INVASIVE GYNAECOLOGY

University/Location	University of Toronto, St Michael's Hospital
Program Title	Minimally Invasive Gynecologic Surgery
Program Director	Dr. Deborah Robertson
Program Administrator	Janet Forrest
Telephone/Fax	(416) 864-5384

Email	roberstonde@smh.ca
Positions	1 per year
Application due date	August 1
Funding/Salary Year 1	
Length of Program	2 years
Additional Degrees i.e: Masters	Yes
Short Description of Program	<p>The 24-month program will consist of 60% clinical work and 40% basic science education and research. The time will be allotted based on the operating room schedule and will contain a minimum of three operating days weekly when on clinical service. In the first trimester, the fellow will be expected to develop a research project to be completed during the year. A 6-8 week elective may be organized in another institution at the discretion of the fellow and supervisor.</p> <p>The gynecologic surgery fellowship entails being responsible for the supervision of weekly gynecologic surgical rounds (reviewing gynecologic surgical morbidity, interesting cases and points of debate), keeping a logbook of cases to be reviewed with the supervisor, and taking part in the schedule to supervise the resident gynaecologic clinic and be responsible for teaching residents and assist at planned surgeries. Another aspect of the fellowship will entail taking calls from home for surgical emergencies and being available to come in when required to manage the gynaecologic surgery cases. Lastly, a completion of a post-graduate degree (ie. Master's of education, clinical epidemiology) is expected during this 2-year fellowship.</p>

MINIMALLY INVASIVE GYNAECOLOGY

University/Location	University of Toronto, North York General Hospital
Program Title	Advanced Gynecologic Surgery and Health Quality Improvement

Positions	1
Application due date	June 17 th - August 15 th of each year
Funding/Salary Year 1	
Length of Program	1 year
Additional Degrees i.e: Masters	
Short Description of Program	<p>North York General Hospital is a leading community academic hospital with one of the highest annual volume of gynaecology procedures done at a single site. There is an unwavering commitment to quality improvement initiatives both at a national and international level – it is a partner site and one of the founding members of the Southern Ontario Network of Obstetrics and Gynaecology (SOON-ObGyn). The Surgical Services Program at NYGH also participates in the National Surgical Quality Improvement Program, often surpassing goals set for the program. Our goal is to train and develop surgeons who will bring the depth and breadth of expertise and leadership at NYGH to their community. Applicants must have completed their FRCS(C) requirements and hold an independent practice license from the Province of Ontario.</p>

Website	https://www.obgyn.utoronto.ca/advanced-gynaecologic-surgery
Email	Judy.Jorge@wchospital.ca
Positions	1
Application due date	June 17 th – August 15 th of each year
Funding/Salary Year 1	
Length of Program	2 years
Additional Degrees i.e:Masters	Research requirements: The fellow will be expected to complete a research project over the course of the fellowship and present at local, national and international conferences. Our fellow will also be expected to create at least one video abstract for presentation. It is expected that the candidate pursue a professional development course/endeavor during the course of the fellowship.
Short Description of Program	This training program will give trainees further expertise with the medical and surgical gynecological care of women. The program will also allow the trainee to engage in clinical research in a related area of interest. We will accept one fellow per year such that at any given time there will be a senior and junior fellow. Our goal is to train academic surgeons who are committed to advancing the field of gynecological surgery.

Positions	
Application due date	September 1 st
Funding/Salary Year	
Length of Program	1 year
Additional Degrees ie Masters	
Short Description of Program	<p>Our Minimally Invasive Gynecologic Surgery (MIGS) fellowship is a 1-year program that has a focus on complex benign gynecologic surgery. We have 5 Ob-Gyn staff who specialize in large fibroid uteri, Stage IV endometriosis, and urogynecologic conditions. We routinely perform total and subtotal laparoscopic hysterectomies, laparoscopic myomectomies with in-bag morcellation, LASER resection of advanced endometriosis, laparoscopic and vaginal urogynecologic procedures and operative hysteroscopies. Fellows will spend 3-4 days/week in the OR and 1-2 days/week in-clinic. There is opportunity for protected education/academic time.</p> <p>Applicants must have fulfilled their FRCSC requirements and hold an independent medical license from the province of Ontario. Benefits, leave, employment policies and other particulars conform to current University of Toronto Department of Obstetrics and Gynecology fellowship rules and regulations. A formal candidate selection process comprises the application process, an interview, and a site visit in early summer.</p>

Program Title	Reproductive Endocrinology and Infertility
Program Director	Dr. Niamh Tallon, MD, FRCSC, FACOG
Program Assistant	Kiyomi Murakami
Email	kiyomi.murakami@cw.bc.ca
Mailing Address	BC Women's Hospital C420-4500 Oak Street Vancouver, BC V6H 3N1
Telephone/Fax	Telephone: 604-875-2572 (Program Assistant)
Website	www.obgyn.ubc.ca/education/fellowships/reproductive-endocrinology-infertility
Positions	1 position every other year. Next available position will be for 2023-2025.
Application due date	March 31st 2022
Funding/Salary Year 1	PGY 6 and 7 salaries, as per Resident Doctors of BC remuneration schedule
Length of Program	2 years
Short Description of Program	This program provides hands-on training of gynecologic and first trimester obstetrical diagnostic ultrasound, as well as hands-on teaching and training of basic ART lab theory and quality management. Reproductive surgery, especially MIS and a large volume of tubal ligation reversal surgery, is a component of the program. Urologic clinics specific to male infertility occur throughout the fellowship. By the second year of training, the trainee sees patients as the primary physician in a weekly REI clinic. Four week selective blocks occur for both pediatric and medical endocrinology. Trainees are also expected to design and implement a research project throughout their training.

Additional Degrees i.e:Masters	Opportunity for Master's degree available.
Short Description of Program	The training program in Gynaecological Reproductive Endocrinology and Infertility (REI) at Schulich Medicine & Dentistry, Western University provides comprehensive clinical and research training for general Obstetrician/Gynaecologists planning an academic career in Reproductive Endocrinology and Infertility. The program has been accorded the status of "Accreditation without Certification (AWC)" from the Royal College of Physicians and Surgeons of Canada. Only those individuals who have Royal College specialty certification in Obstetrics and Gynaecology in Canada and who have successfully completed the REI program, will be recognized for their added competence by the Royal College, and listed as such in their registry. Recognition for satisfactory completion will be granted to all others by Western University. The expected roles of the trainee as a Medical Expert/Clinical Decision-Maker, Communicator, Manager, Health Advocate, Scholar and Professional will be evaluated and integrated with the objectives of the training program.

REPRODUCTIVE INFECTIOUS DISEASES

REPRODUCTIVE INFECTIOUS DISEASES

University/Location	University of British Columbia (Vancouver)
Program Title	Reproductive Infectious Diseases
Program Director	Dr. Chelsea Elwood
Mailing Address	BC Women's Hospital C420-4500 Oak Street Vancouver, BC V6H 3N1
Website	https://obgyn.ubc.ca/education/cross-discipline-fellowship/reproductive-infectious-diseases/
Email	Chelsea.elwood@cw.bc.ca
Positions	1 position per year
Application due date	Rolling applications are accepted
Funding/Salary Year 1	Determined yearly
Length of Program	2 years
Additional Degrees i.e: Masters	
Short Description of Program	<p>UBC's Fellowship in Reproductive Infectious Diseases is the first and only subspecialty training program in Canada focused on infectious diseases for obstetricians and gynaecologists. The fellowship program provides advanced subspecialty training and education in infectious diseases, including HIV, Hepatitis C, and Herpes in pregnancy as well as the evaluation and management of vaginal infections. The program provides opportunities for fellows to expand their knowledge through teaching, research and care, while developing leadership skills in their respective fields.</p> <p>Through scheduled rotations and electives, fellows gather knowledge from every component of the infectious disease subspecialty. The objectives of the clinical training program are achieved by a series of integrated rotations at the participating institutions. Fellows gain first-hand clinical experience at BC Women's Hospital, which sees over 7,000 births per year, and are mentored by internationally renowned experts in the field. St. Paul's Hospital and VH&HSC share responsibility for Adult Infectious Disease training in the full spectrum of acute, chronic and recurrent infectious diseases, in hospitalized and ambulatory patients. The program can also offer distributed education throughout Canada with other RID sites.</p>

UROGYNAECOLOGY

University/Location:	University of Alberta
Program Title:	Female Pelvic Medicine and Reconstructive Surgery
Program Director:	
Program Assistant:	
Program Assistant Email Address:	eckelly@ualberta.ca
Mailing Address	
Telephone:	
Website:	Female Pelvic Medicine Fellowship Obstetrics & Gynecology (ualberta.ca)
Positions:	1
Application due date:	
Funding/Salary Year:	Determined yearly
Length of Program:	2 years
Additional Degrees:	MSc required (Reproductive and Developmental Sciences program, or other relevant program)
Short Description of Program:	The Division of Urogynecology in the Department of Obstetrics & Gynecology at the University of Alberta offers a two-year clinical fellowship in Female Pelvic Medicine and Reconstructive Surgery. Six FPMRS surgeons work out of a busy multidisciplinary clinic, which includes nurse continence advisors, nurse practitioners, pelvic floor physiotherapists, a dietician, a pharmacist, and an exercise physiologist. Three of our FPMRS surgeons also work out of the Chronic Pelvic Pain clinic; selective time in this clinic is strongly encouraged during fellowship. We have an excellent working relationship with colorectal surgery, urology, minimally invasive gynecologic surgery, and geriatrics. Selective rotations in these subspecialties are also strongly encouraged and supported throughout fellowship.

Website:	www.obgyn.ubc.ca/education/advanced-training-programs/fpmrs
Positions:	1
Application due date:	June 30, 2021 (for 2022 – 2024)
Funding/Salary Year:	Determined yearly
Length of Program:	2 years
Additional Degrees:	
Short Description of Program:	<p>Our innovative curriculum allows the trainee to develop expertise in diagnosis, evaluation and treatment of various pelvic floor disorders. Both conservative and surgical options are emphasized during training. The trainee gathers gradual expertise in a broad range of surgical procedures, through open, laparoscopic and vaginal routes. Core rotations are Urogynecology and Urology. Local elective opportunities in Sexual Medicine, Pelvic Pain, Geriatric Medicine and Colorectal Surgery, as well as national or international electives are encouraged.</p> <p>A collegial atmosphere allows close collaborations with allied health professionals such as nurse continence advisors and pelvic floor physiotherapists. Trainees are encouraged to conceptualize a program of research, apply for competitive grants, and oversee it from development to fruition with support from basic science, statistics and other collaborators.</p>

Email	michelle.pineau@iwbk.nshealth.ca
Positions	One fellowship position available for 2021
Application due date	Feb 28
Funding/Salary Year 1	\$79,860 *Subject to change based on Maritime Resident Doctor Contract
Length of Program	2 years
Additional Degrees i.e: Masters	N/A
Short Description of Program	<p>Uro-Gyn is a two-year (optional one-year), full-time clinical and research subspecialty residency. While the Uro-Gynaecology specialty is not accredited nationwide, we feel it is important in the care of our patient population so we offer an unaccredited fellowship program in this specialty. Dalhousie University and Department of Obstetrics & Gynaecology will issue a certificate for successful completion of this fellowship.</p> <p>We have a maximum of two Uro-Gyn subspecialty residents, one senior and one junior. As a junior resident, you are expected to attend the urogynaecology clinics of our department members and to participate in all urogynaecologic surgery. As a senior resident, you will have time to do electives and to conduct research designed in your first year of subspecialty residency.</p> <p>The salary for this position is either generated through billings for surgical assistantship or by successful application for a hospital board funded position. The salary is equivalent to a 5th year residency position and is paid by Dalhousie University.</p>

UROGYNAECOLOGY

Length of Program	2 years
Additional Degrees i.e: Masters	Must have training in an Obstetrics and Gynaecology Residency Program to apply
Short Description of Program	The MUHC Division of Urogynaecology & Pelvic Floor Reconstructive Surgery offers tertiary level care to patients with pelvic floor dysfunction. A 2-year clinical and research fellowship training program was initiated in 2013 in Female Pelvic Medicine and Reconstructive Surgery and was designed to provide comprehensive understanding of female pelvic medicine. Conditions investigated and treated include urinary and fecal incontinence, pelvic organ prolapse, urogenital fistulae, pelvic visceral pain syndromes (particularly interstitial cystitis and myofascial pain), and voiding and sexual dysfunctions. The fellow attains awareness of pelvic floor anatomy, physiology, and the diagnostic criteria and pathophysiology of various aspects of pelvic floor dysfunction. Management of pelvic floor dysfunction is carried out in a multidisciplinary fashion with involvement from members of the Divisions of Urology, Colorectal Surgery, and Pelvic Floor Physiotherapy. Surgical expertise is gained in laparoscopic approaches (sacral colpopexy/hysteropexy, total hysterectomy, uterosacral/paravaginal suspensions), incontinence procedures (mid-urethral slings, pubovaginal slings, periurethral bulking), vaginal approaches (hysterectomy, colporrhaphies, vaginally- assisted laparoscopic sacral colpopexy, transvaginal mesh systems, fistulae repair, sphincteroplasty, sacrospinous suspensions), cystoscopy (ureteral catheterization, Botox injection), and intraoperative injury prevention and management. Modalities offered include consultation services, pessary fitting, indications for and interpretation of multichannel urodynamic studies, outpatient cystoscopy, bladder installation therapy, behavioural modification, pharmacotherapy, and levator ani assessment. Research projects are facilitated and presented.

Additional Degrees i.e:Masters	-
Short Description of Program	L'urogynécologie et la chirurgie reconstructive du plancher pelvien sont des surspécialités de la gynécologie. La majorité des grandes universités américaines ont un programme de surspécialisation de ce type de même que quelques universités canadiennes. Cette surspécialité a connu un développement important depuis 15 ans avec l'ajout de nouvelles technologies d'investigation et d'évaluation et avec l'arrivée de nouvelles techniques chirurgicales et de nouveaux matériaux pour ces chirurgies. Avec le développement, sont également apparues les complications que les milieux de soins tertiaires doivent prendre en charge.

Application due date	June 30 th to start the following July 1 st
Funding/Salary Year 1	
Length of Program	2 years
Additional Degrees i.e: Masters	
Short Description of Program	Our two year Fellowship combines clinical, teaching and research elements of Urogynecology and Reconstructive Pelvic Surgery. The scope of practice in female pelvic floor disorders ranges from urinary incontinence, pelvic floor prolapse, infectious and inflammatory diseases of the pelvis, fistulae, diverticulae, voiding and defecation dysfunction, painful bladder syndromes, to neurological pelvic floor dysfunction and lower urinary tract function in pregnancy, amongst others. Patients are evaluated with history, physical exam, multichannel urodynamics, cystoscopy, and ultrasound as required. Cases are managed conservatively or surgically. We favour transvaginal, retroperitoneal, and laparoscopic reconstructive procedures as well as minimally invasive techniques. Fellows are engaged in academic and community clinics, surgery, teaching residents didactically and surgically, presenting rounds, anatomy lab teaching, and their own research. Our team of four Urogynecologists and three Nurse Continence Advisors comprises a regional centre for primary, secondary, and tertiary care referrals.
